Note on the data collection method:

The summary of tourist attraction visitor statistics has been compiled by monitoring the number of visitors to over 1400 tourist attractions in cooperation with regional coordinators and operators of tourist attractions. The list is not exhaustive, however, and some tourist attractions may be missing. The data originates from information provided by the operators of individual tourist attractions on the total number of recorded visitors, regardless of whether or not the visitors pay a fee. The data covers visits by tourists from both the Czech Republic and abroad.

If operators of two or more individual attractions provide aggregate visitor statistics, these figures are listed the category “combined tourist attractions”. Such groups of tourist attractions which are promoted under one marketing brand name are generally identified by the name of the main attraction or the operator’s name.

The summary is purely for informational purposes and is not intended as an evaluation of the performances of individual attractions or operators. The aim is to create a uniform database and to promote less visited tourist attractions.

Number of Visitors to Tourist Attractions in 2019

Published by CzechTourism, Prague, 2020.
