*Note: "Other Asian countries" do not include China, India, Israel, Japan or South Korea, which are tracked separately by the Czech Statistical Office. The Czech Statistical Office started tracking these Asian countries in 2015: Taiwan, Saudi Arabia and the United Arab Emirates, which were split off from the Other Asian Countries category. However, since the increases and decreases in visitor numbers and overnight stays year-on-year cannot be reported for the newly tracked countries due to lack of information for last year, the increase in 2015 is reported along with the entire Other Asian Countries group.
